About Me

Talented software developer with a Level 4 certificate in Software Development, and furthermore studying Computer Science at The De Montfort University. Experienced in updating Microsoft Dynamics systems with either new or improved functionalities. Enthusiastic professional with complete understanding of entire software development lifecycles. Highly trained and known for having talents in programming and designing.

Professional Experience

April 2021 – August 2021 Junior Software Developer The NAV People | The 365 People
As a Junior Developer my job included working within the Support team, completing small modifications and delivering new functionalities as per customer requests. I was in constant contact with customers to ensure that the delivery of my services satisfied the customer. As part of my job I had to understand a vague change request from the customer, turn that into a Change Request Form, deliver the change and then provide the customer with Release Notes/User Manuals upon project completion.

July 2020 – April 2021 Developer Apprentice The NAV People | The 365 People
As an Apprentice, I was focused on learning about the right processes for software development and have been part of the Support Team within the company, completing small modifications to client's systems based on a ticketing system. With the increased exposure to direct work with customers, I have been able to improve my programming and communication skills.

September 2019 – April 2020 Apprentice Developer K3 Business Technologies
As an Apprentice my main focus was to get a good understanding of the workings of the company as well as the software. I was involved in training for Microsoft Dynamics NAV 2009, 2013, 2018 and Microsoft Dynamics 365 Business Central as well as LS Central; in languages C/AL, .NET, AL. I have completed enhancements for clients in their live environment as well as consultation on site. Built my own cinema ticketing database in Microsoft Dynamics NAV 2013 as an ongoing project with the company. Implemented the Waterfall model in work.

Other Experience

June 2019 – December 2019 Front of house Staff Member The Leafy Elephant
March 2018 – May 2019 F & B Assistant Hotel Du Vin, Henley – On - Thames
